

### **Automotive Lamps Black Rubber Gaskets**

KINGTOM is a major manufacturer and supplier of rubber products in China. Car Lamps Rubber Gaskets With wide temperature adaptation, sealing, insulation, dielectric, environmental protection and other good characteristics, while high and low temperature resistance, less interference by the external environment, so it is the most ideal waterproof, sealing material, waterproof ring.

#### **Product Parameter of the Automotive Lamps Black Rubber Gaskets:**

- ①Product name: **Automotive Lamps Black Rubber Gaskets**
- ②Material: EPDM NBR Silicon or Can Custom
- ③Logo: Can Custom
- ④Size: Can Custom
- ⑤Can Custom: Black or custom
- ⑥Application: Automotive
- ⑦Certifications: IATF16949 ,ISO14001:2015,ROHS,CMC, etc
- ⑧Delivery: 30 -50days after sample confirmation
- ⑨Sample: 25-30 days
- ⑩Payment: 30% deposit, 70% payment before shipment
- ⑪Package: PE bags, Cartons,Pallet
- ⑫Payment Terms: T/T,L/C and so on.
- ⑬Shipment Way: Vessel,Air,Express etc.

#### **Product Feature AND Application of the Automotive Lamps Black Rubber Gaskets:**

**Automotive lamps rubber gaskets** to be affected by the heat of the bulb irradiation, in the corresponding high temperature environment must ensure that the bonding and sealing performance does not change, at the same time can not release the gas of the agricultural production system, produce atomization phenomenon, and not yellow, affect the appearance;

Secondly, when the lamp sealant is exposed to ultraviolet light in the sun, there will be no aging phenomenon such as cracking, which requires that the lamp sealant needs to have good uv aging resistance; The rear lamp sealant will also be corroded by water vapor and rain for a long time, so as to ensure that its sealing performance will not be affected.
